### **Course Description:**

ITALIAN STUDY CENTRES ONLY. This course examines enduring and contemporary questions of security and insecurity in the international system. Security has traditionally been defined in terms of strategic state politics and the use of military force to counter external military threats. The end of the Cold War and the ensuing conflicts of the late-20<sup>th</sup> century raised questions about the continued relevance of traditional theories of security. New security threats have been defined both in the academic literature and by state security strategies. This course critically evaluates these developments using IR and security studies theories, supplemented by practical case-studies. Students investigate the definition of the term security and threats to security, questions about the referent object of security, the root causes of insecurity and the methods of eliminating or lessening such threats. The course evaluates traditional and contemporary security concepts such as national security, conventional weapons systems, nuclear non-proliferation, human security, responsibility to protect, the poverty-security nexus in a post-Westphalian context. Note: this course is cross-referenced against INR 5205.

**Pre-requisites:** INR 4100
