Academic School/Department: School of communications, Arts and Social Sciences

Programme: Psychology

FHEQ Level: 6

Course Title: Psychology of Happiness and Wellbeing

Course Code: PSY 6430

Course Leader: Dr Annita Ventouris

Student Engagement Hours:	120
Lectures:	30
Seminar / Tutorials:	15
Independent / Guided Learning:	75

Semester:	Spring
------------------	--------

Credits:	12 UK CATS credits
	6 ECTS credits
	3 US credits

Course Description:

Positive psychologists argue that traditional psychology has tended to focus on dysfunction and unhappiness and that balance needs to be restored by research into what makes life go well. This course focuses on the science of happiness and wellbeing, integrating findings from Positive Psychology studies and theories. During this course, students will critically evaluate the teaching of Positive Psychology as a means of enhancing happiness and understand the difference between weaknesses and strengths, and how positive psychology emphasises the latter in contrast to traditional psychology's emphasis on the former. Students will appreciate some of the factors that lead to happiness and learn how to capitalise on these factors in order to achieve lasting happiness, especially by getting to know their own strengths; students will also understand and use a variety of techniques and interventions designed to enhance happiness and wellbeing.

Prerequisites: PSY 4210 Developmental Psychology and PSY 5200 Theories of Personality

Aims and Objectives:

This course is designed to explore the concepts underlying Positive Psychology and provide an overview and understanding of the techniques and exercises associated with wellbeing. The format of the course will be didactic, experiential, and interactive.

Programme Outcomes:

6A.i, 6B.i, 6C.i, 6C.iv, 6D.i

A detailed list of the programme outcomes are found in the Programme Specification.

This is located at the archive maintained by the Academic Registry and found at: <http://www.richmond.ac.uk/content/academic-schools/academic-registry/program-and-course-specifications.aspx>

Learning Outcomes:

Students should be able to:

- Understand and evaluate key concepts in positive psychology.
- Assess the research basis for interventions designed to increase wellbeing.
- Reflectively consider application of research to one's own life.

Indicative Content:

Subjective Wellbeing
Hedonic and Eudaimonic Approaches to Happiness
Authentic Happiness
Positive Emotions
Strengths and Virtues
Happiness, Wealth and Materialism
The Body in Positive Psychology
Applications of Positive Psychology

Assessment:

This course conforms to the Richmond University Standard Assessment Norms approved at Learning and Teaching Policy Committee found at: <http://www.richmond.ac.uk/content/academic-affairs/academic-standing.aspx>.

Teaching Methodology:

The course material will be covered in the following ways:

- I. Formal lectures
- II. Discussions of key ideas
- III. Recommended readings and websites
- IV. Films

Bibliography:

See syllabus for complete reading list
